

CHRONOGRAPH STAGE BRIEFING

Welcome to the Chronograph stage. Leave your unloaded revolver holstered or bagged until you are invited to the chrono table. Once individually invited, the CRO will give the “Make Ready” command. Place your empty revolver on the bench, muzzle pointed downrange and the cylinder open. The CRO will take your revolver and fire as many as 6 rounds of your ammunition to acquire velocity. The velocity, along with the weight of a pulled bullet, will be used to determine power factor for a pass/fail score. After this is finished, your firearm will be returned to the table. Wait until the CRO gives further range commands to unload and show clear and holster/bag your revolver.

If your revolver is bagged, please ensure you are wearing your gun belt. The CRO may require you to holster to check for rules compliance. There are no targets to be scored and no walk-through time. Penalties are per the current ICORE Rule Book.
