

The diagram illustrates a target range layout. A vertical dashed line serves as a central axis. To the left of this line are targets T1, T2, and T3. To the right are targets T4, T5, and T6. At the bottom, there are two starting positions, A and B, represented by green and blue squares respectively. Horizontal dimensions indicate the distance from the central axis to each target and the distance between A and B. Vertical dimensions indicate the height of each target above the starting positions.

Target	Horizontal Distance from Central Axis	Vertical Height from Starting Position
T1	9 ft (2.74 m)	27 ft (8.23 m)
T2	6 ft (1.83 m)	24 ft (7.32 m)
T3	3 ft (0.91 m)	21 ft (6.40 m)
T4	3 ft (0.91 m)	27 ft (8.23 m)
T5	6 ft (1.83 m)	24 ft (7.32 m)
T6	9 ft (2.74 m)	21 ft (6.40 m)

Additional dimensions shown in the diagram:

- Distance between starting positions A and B: 6 ft (1.83 m).
